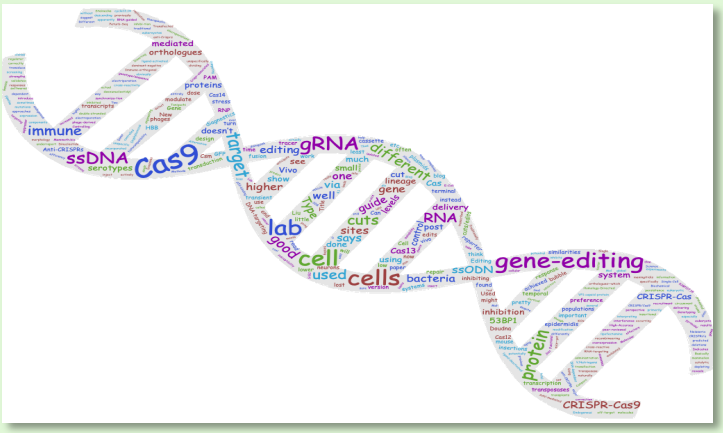
SCC CRISPR Facility presents:

CRISPR Seminar Series

Short talks about current use of CRISPR technology and the research outcomes.

Tuesday November 26th 2019, 15:30-16.30
Segerfalksalen, BMC A10



Speakers:
15.30 Karolina Pircs – **CRISPRi: same target, cell type specific outcomes.**
Molecular Neurogenetics, Dept. of Experimental Medical Science

15.50 Kenichi Miharada – **CRISPR to modify large pend products**
Stem Cell Metabolism, Dept. Molecular Medicine and Gene Therapy

16.10 Louise Cornmark – **Creating a chromosomal translocation with CRISPR and using CRISPRi, to investigate TP53 in osteosarcoma**. *Division of Clinical Genetics*

Fika starting at 15.00

No registration. First come, first served (Fika & seats).
